## Work experience

---

### Logispin Group

January 2016 - Present

#### Team Lead of Layout Frontend Development

A large-scale layout frontend development for online betting and casino gambling websites. Frontend team is split into two, (my) Template team and JavaScript team.

- **Co-author of a large-scale in-house CSS framework, written from scratch**, used on most projects
- **Significantly improved our work** by introducing new methodology to the team
- **Reduced CSS footprint by 70%** on largest company project by rewriting it from scratch
- Delivery of highly scalable and modular HTML templates for JavaScript team
- Managing my teammates' work, ensuring proper cooperation with other teams
- Regular oversight and technical assistance for **over 80 active projects**
- Vast **mentoring experience, coaching** junior and intermediate developers to be independent

All projects' HTML templates are being kept on corporate Test HTML servers, which anyone within the company can access for reference.

---

### CoreQuality Solutions

November 2014 - January 2016

#### Layout Frontend Developer

Layout frontend development for online betting and casino gambling websites. I made HTML templates which were being used by JavaScript developers.

---

### Pauk

September 2013 - August 2014

---

## Skills

---

### Layout Frontend Development

- Expert in HTML/CSS template development, using SASS (SCSS) and BEM methodology
- Delivery of modular, reusable and scalable HTML components
- Delivery of clean styles with minimal redundancy and zero CSS specificity
- Meticulous code and obsession with tight layout optimization for most devices
- Mentoring and coaching

### Utility

- Gulp, Git, SVN, GitLab, GitHub, Jira

### Languages

- English, Serbian

## Other interests

---

### Cybersecurity

My cryptocurrency involvement, in both technical and speculative way, raised my awareness for privacy and anonymity, waking up my old passion towards hacking and cybersecurity in general. At the moment, I consider offensive cybersecurity engineering as a hobby of mine.
